Join an established and growing medical company with a very advantageous market position.

Vice President Supply Chain

In total charge of the corporate supply chain function for a multi-national, multi-plant hardware manufacturer:

- Ownership of global supplier process: supplier selection; negotiations; contract compliance; strategies and management
- Improve inventory control processes
- Control Sales and Operations Planning, metrics and reporting
- Improve data integrity
- Achieve customer satisfaction and cost effectiveness through security of supply chain, increased quality and better cost performance
- Lead strategic sourcing initiatives for components
- Integrate internal/external manufacturing operations for best possible synergy
- Integrate acquisitions, standardizing supply chain practices
- Full budget responsibility
- Develop supplier evaluations, scorecards and track spend category performance
- Create worldwide reporting and metrics to monitor results globally
- Execute Material Control Systems
- Develop Supply Chain personnel

To qualify this client has been very specific and precise about the needed experiences, expertise and industry background:

- BS mandatory; Certification is a plus; MBA preferred.
- Currently managing complete corporate supply chain: purchasing, planning, inventory, logistics for a hardware manufacturer
- Managed corporate supply chain with a spend in the neighborhood of \$100-300M
- Absolutely mandatory that this candidate has managed the complete corporate supply chain for a hardware manufacturer that is either:
 - a low margin business
 - or
 - a world class, leading edge materials enterprise in a highly competitive market (a “commodity firmware” manufacturer)
- Has managed the supply chain through the acquisition integration process

- Comprehensive financial experience
- Significant supply process design and analysis
- Impressive bottom line supply chain results in a matrixed, multi-national, multi-plant organization
- Seasoned systems pro: Office, Excel, ERP and integrated software systems
- Implementation of Lean Manufacturing and Six Sigma principles into the supply chain
- Any regulatory or FDA experience is an asset but not required

Location: Andover /Methuen area MA

Relocation is available

Compensation: commensurate with job responsibilities
