

## **Manager/ Director of Supply Chain - electronics**

Excellent career opportunity with an expanding medical electronics manufacturer.

Report to the C.O.O. and manage the entire supply chain function at a company with advanced products for improved healthcare currently on the market, and a robust R&D pipeline.

### **Responsibilities**

Implement new ERP supply chain management systems

Manage entire supply chain of complex electronic and other components: supplier management, purchasing, warehousing, shipping and receiving

Lead the supplier selection process, and collaborate with engineering and quality personnel to evaluate and qualify new suppliers

Negotiate supply agreements and manage suppliers and purchases to ensure security of supply, supplier capacity, timely delivery, best pricing and contract terms, and a high level of quality for all parts and supplies

Manage the materials requirements planning process to ensure materials are available when needed, without carrying excessive inventory levels

Supervise purchasing, inventory control and shipping/receiving personnel

Continually upgrade Company operating procedures to integrate best practices for supply chain management and customer order fulfillment

Collaborate with finance personnel to ensure timely close-out of monthly reporting requirements and physical inventory procedures

### **Critical Knowledge, Skill and Abilities:**

Broad knowledge of electronic component sourcing and suppliers

Excellent organizational skills, attention to detail, and ability to prioritize tasks within a busy environment. Ability to solve problems and act independently.

Demonstrated skilled negotiator with strong knowledge of contract terms and conditions and ability to locate supply sources and manage inventory and spare parts levels.

Detailed knowledge of the interaction between manufacturing and accounting processes, and the associated transactions

Detailed knowledge of ERP/MRP software; experience with SAP is a plus

High level of proficiency with Microsoft Excel

Excellent written and verbal communication skills.

**Experience/Education:**

Minimum 10 years experience in a supply chain management role within the electronics or medical instrumentation industry, with direct responsibility for managing vendors and negotiating contracts.

Successful experience implementing an ERP system

Successful management experience in a rapidly expanding, dynamic environment

Successful management experience planning and procuring materials for new product scale up and manufacture

A minimum of a BA/BS in Business or a Supply Chain related field is required.
