

This well established, highly profitable, midsized company has created this management role in reaction to continued high growth.

Supply Chain Manager

Leading the supply function, the Supply Chain Manager will develop the strategic direction of the supply chain. As a key member of a small management team, this manager will have a hands-on role and will be responsible for the sourcing, purchasing, scheduling and inventory planning functions. Will manage 2 buyers

- Responsible for supplier performance, management quality, service and cost
- Insure proactive scheduling to maximize customer service and manage inventory.
- Manage and execute contractual agreements
- Generate and present key supply chain metrics
- Maximize supply chain flexibility while minimizing risk
- Develop and implement strategic and tactical plans for improving supply chain performance
- Develop material and outside sources and strategies that provide improved results for the company

Minimum Experience Required:

- Bachelors degree
- 7+ years managing a supply chain department (purchasing, planning and inventory)
- Demonstrated expertise in managing supplier agreements for a machining manufacturing operation
- Highly experience with MRP/ERP systems
- Strong analytical and negotiation skills
- Background in precision machining is a significant plus
- Proficiency with ERP, MS and Access
- Lean and six sigma experience

Location: Medford / Melrose area

Relocation is not an option

Compensation: Into the low 100's
