
The client is a well established, profitable supplier to the pharmaceutical, biomed and medical industries.

Buyer/Planner

The position is responsible for ensuring that the demand for purchased items are met in a timely and cost-effective manner, that the stocking levels are maintained within established guidelines, and that the development and implementation of production and manufacturing schedules meet customer requirements and maintain proper inventory levels.

1. Procure standard product materials
2. Maintain a strong working relationship with the supplier base.
3. Participate in supplier selection and on-going supplier evaluation on a regular basis.
4. Manage Purchase Price Variance (PPV) to standard costs.
5. Plan purchasing and production activity through ERP and advanced Lean Manufacturing methods.
6. Maintain appropriate inventory levels
7. Drive continual improvement in supplier-base quality, material costs, inventory turns and delivery performance.

Minimum Requirements:

- BS Degree
- Last 5 years working with ERP as a buyer planner in a manufacturing environment
- Experience in planning and purchasing using an ERP system
- Strong ERP planning skills
- Significant experience implementing and working with a top-tier ERP system
- Impressive track record of applying ISO-9001, six sigma and Lean manufacturing principles

Compensation: base salary in the 60's

Location: Framingham /Milford MA area – local candidates ONLY
