

Job Description Title: Production Scheduler

Ref No: 475

Location: Danvers, MA

We are currently working with an organization that has grown to be the global market leader in its niche over the past 20 years. With facilities in the U.S. and Europe, our client is looking to improve their production planning processes, looking to bring on a Production Scheduler to help support the U.S. facility.

Position Description:

- Production Scheduler reporting to the Production Manager.
- Manage production- and material plans for the Danvers, MA plant.
- Ensure month-to-month capacity is available to deliver on demand.
- Measure and drive continuous improvement efforts related to schedule adherence, inventory, cost and manufacturing cycle times.
- Identify and resolve imbalances between Supply & Demand.

Background Required:

- 2-3 years of production planning, master scheduling experience.
- Prefer knowledge of Lean or 6-Sigma process improvement.
- Experience working with preform and/or molding materials.
- Experience with a MRP software like SAP, Oracle, JD Edwards, Great Plains, or equivalent.
- Bachelor's Degree.
- Proven track record of success in similar role.

Compensation Plan:

- \$50-60K + 20% bonus
- Full benefit package including medical, dental, disability, and 401(k).
