Get the entire team on the same page, at the same time
Eliminate travel costs, and reduce time away from the job
Increase productivity by ensuring uniform instruction for key personnel
Provide tailored instruction to fit the organization's needs

NEW!! Customer-Focused Supply Chain Management

A one-day course for professionals in functions that support the supply chain (for example, sales and marketing, accounting, information technology, and senior executives).

The class, **Customer-Focused Supply Chain Management**, provides an insider's view of supply chain management. It offers fundamental knowledge of the functions of SCM and is designed to quickly and effectively educate team members who interact with or support supply chain activities, helping to increase efficiency and generate ideas for improvements.

After this course, participants can more fully contribute to the cross-functional and interorganizational processes of a successful supply chain. Further, the class leads participants and others in their organizations to the APICS Certified Supply Chain Professional (CSCP), Certified in Production and Inventory Management (CPIM), and other APICS programs.

The course strengthens the entire team and fosters appreciation of a properly structured and managed supply chain.

Participants in this program will:

- Learn the basic terminology used in SCM and be able to more effectively communicate with SCM teams.
 - Understand the basic elements of SCM and how improvements in processes and communication can lead to increased overall customer satisfaction and profitability.
 - Be more fully integrated as a part of the team supporting the increasingly important SCM function

Lean Enterprise Workshop

28 hours total

As more organizations decide to go lean, demand is escalating for a skilled team and system wide approach for developing and implementing lean project plans. This course is designed to equip you with the broad knowledge and tools to map the transformation for developing a lean culture at your organization. Six sessions:

Introduction & Overview
Lean Culture
Value Stream Mapping
Stability and Process Improvements
Just-in-Time
Measuring
Sustaining

Project Management Workshop:

36 hours total

Based on the world famous [Project Management Institute](http://www.pmi.org) (PMI) body of knowledge, this workshop is

appropriate for a wide range of professionals.

Who should attend:

1. Professionals with five or more years of experience managing projects:
Perfect for PMP exam preparation.
2. Professionals with three or more years managing projects:
Perfect for CAPM exam preparation

3. Project Team Members: Professionals and others involved with team based projects:
Perfect for getting everyone on the “same sheet”, and increasing the
project’s likelihood of success.
No PMI exam required.

The Project Management Team:

This Project Management body of knowledge teaches a basic set of principles that, ideally *all* members of the project team should understand. Just as we train our associates in all important aspects of their jobs, we must not ignore training in this critical area.

CAPM Certification:

Certified Associate in Project Management (CAPM) certification provided by PMI teaches entry level Project Managers and non-managing project team members the skills, concepts and terminology to succeed in the dynamic environment of a project team in today’s complex environments. This workshop prepares the candidate for this exam.

PMP Certification:

Project Management Professional (PMP) certification controlled by the [Project Management Institute](#) (PMI) empowers the professional, experienced Project Manager with the knowledge required to manage complex projects and consistently deliver on time and in budget. This workshop prepares the candidate for this exam.

General Information

Class sizes:

Minimum class size for “normal pricing” is six or more.

However we have a small class strategy; any class may be tailored to fit your specific needs.

Costs: We can likely match or beat anyone else. Give us a try.
